Group

Uncertain economic outlook for GER, limited momentum overall and profound structural challenges will limit its long-term growth potential.

Productivity growth in GER remains comparatively low.

Increasing volatility on international markets are hampering economic planning and influencing investments across national borders.

Integration of the two segments by the systematic incorporation of Training offerings into existing sales opens up new corporate customers.

Personnel Services segment

Despite the current economic downturn, there continues to be a structural shortage of skilled workers, which will remain effective in the long term.

In the short term, however, this is being overshadowed by economic uncertainty and a reduced willingness to change jobs.

Focus on ongoing organisational efficiency and cost-saving measures.

At the same time, targeted investments will continue to be made in the further development of systems, processes and digital and AI-supported solutions to strengthen operational performance and competitiveness in the long term.

Training segment

Unemployment rate of 6.5% in GER is still high representing 3.1 million people unemployed.

Focus will remain on productivity increase & cost reductions, in B2G business with a much more positive earnings outlook for 2026 and a significant y-o-y upside potential.

Key strategic focus will be on the consistent 'AI First' orientation of the segment.

Integration of scalable SaaS platforms (B2B) with recurring revenue structures of latest acquisitions Masterplan and eduBITES give access to new corp. customer segments.

B2C Training is still expected to end FY 2026 successful again.
